

We would like, both at Kulczyk Investments and at the Polenergia Group to share the news of which we are proud - during the annual CEE Energy Awards (<http://ceeenergyawards.com/>) we were fortunate to receive two awards:

1. **Wind Energy Company of the Year:** <http://ceeenergyawards.com/categories-and-nomination-process/>. Awarded to PEP/Polenergia in recognition of the successful strategy of building a strong on shore operational base, closing of a project financing last year for 70MW, development of one of the best advanced near term on-shore pipelines in Poland, plus a consistent approach to off shore wind for the future. The jury for this award (<http://ceeenergyawards.com/jury/>) was formed of lawyers, bankers, consultants, investors, think tanks, strategic/financial players and journalists.
2. **Leadership Award:** <http://ceeenergyawards.com/2014-cee-energy-leadership-award>. Awarded to Zbigniew Prokopowicz in recognition of his achievements in the Polish energy sector, leadership in renewables energy, and strategy to build a major utility across the full electricity value chain. The award was given after a thorough analysis/shortlisting of potential nominees through interviews with key players in the CEE energy markets selected from a wide array of sources including financiers, engineers, lawyers, consultants, market players and journalists.

We are very happy to have had our efforts recognised by an independent pool of such respected and recognised sector experts.
